1. The capability of the operating system to enable two or more than two programs to execute simultaneously in a single computer system by using a single processor is called
 - 1) Multiprocessing
 - 2) Multitasking**
 - 3) Multiprogramming
 - 4) Multiexecution
 - 5) None of these
2. ENIAC stands for
 - 1) Electrical Numerical Integrator and Calculator
 - 2) Electronic Numerical Integrator and Computer**
 - 3) Electronic Numerical Integrator and Calculator
 - 4) Electronic Number Integrator and Calculator
 - 5) None of these
3. The first generation of computers was based on which of the following technologies?
 - 1) Transistor
 - 2) Vacuum Tube**
 - 3) LSI
 - 4) VLSI
 - 5) None of these
4. Before a disk drive can access any sector record, a computer program has to provide the record's disk address. What information does this address specify?
 - 1) Track number
 - 2) Sector number
 - 3) Surface number
 - 4) All the above**
 - 5) None of these
5. As compared to diskettes, the hard disks are
 - 1) more expensive**
 - 2) more portable
 - 3) less rigid
 - 4) slowly accessed
 - 5) None of these
